The Oyen News

Curlers Go to Kindersley in Quest of Beaver Cup

Two rinks went to Kindersley on Monday afternoon to curl for the Beaver Cup, but were unsuccessful in their efforts. The personnel of the rinks was as follows: S. A. Miller, sk. C. Stewart, A. Sharp and C. Willson, (1 up). G. Langmuir, sk. G. A. Morrison, A. Wright and E. MacArthur, (7 down). Miller's score was 9 to 8, and Langmuir's 6 to 13. The total score Oyen 15, Kindersley 21.

Rinks Go To Chinook After MacPerson Cup

Two rinks, skipped by T. Lees and C. Willson were Chinook visitors Saturday night, endeavoring to bring the MacPerson cup back to Oyen. Their aggregate score was one short of that of the defending rinks and the cup remained in Chinook. The personnel of the rinks from Oyen was as follows: T. Lees, sk. E. D. Thygeson, A. Wade and A. O. MacArthur, (2 up). C. Willson, sk. J. Marshall, I. Gillespie and C. Stewart (3 down).

Milder Weather

Last week's cold weather, during which sub-zero temperatures were recorded, notwithstanding Saturday and the district experienced a pleasant week-end. Temperatures this week have ranged between ten above zero in the early morning hours

Sir Henry Thornton Dies in New York

Sir Henry Thornton, K.B.E., former chairman of the Board of the Canadian National Railways, died in a New York hospital, Tuesday afternoon, March 14. On his return after a recent trip to Cuba, he found it necessary to undergo an operation last week. Complications followed, and on Monday night he lapsed into unconsciousness and remained in that state until his death.

Major General Sir Henry Thornton, K.B.E., was another notable figure in Canadian railroad history. He was appointed president and chairman of the board of directors of the Canadian National Railway in 1922, following eight years of brilliant service as general manager of the Great Eastern Railway, 1914-1922. For ten years he devoted his energy and ability to consolidating and improving the great National railroad system. He resigned from his arduous executive position in August 1932.

Sir Henry was born at Loganport, Indiana, in November 1871, and died at the age of 62 years.

M. D. of Golden Centre

The 1st. meeting of Council of the M. D. of Golden Centre No. 272 was held at the N.E. 13-30 5-4, on Monday March 13.

Members all present. Ed. Stewart was appointed Reeve, R. Cates Deputy Reeve, R. Green Secretary treasurer, at a salary of \$1200.00, and J. C. Cottrell, Auditor, at a salary of \$800.00.

Councillors fees were fixed at \$3.50 per day for meetings and road inspection and mileage at 10c per mile.

The Reeve or Deputy Reeve and Secretary-treasurers were empowered to sign all cheques, notes, etc. and Secretary-treasurer to endorse all cheques, drafts, etc., for deposit.

The Reeve or Deputy Reeve and Secretary-treasurer were empowered to forward all collections of taxes which have been levied for the Province, Rail Insurance Board and School Districts.

The Secretary-treasurer was instructed to make levy of school taxes as per the estimated expenditures of the School Districts.

The place of meeting was fixed at the N.E. 13-30 5-4 to be held on the first Saturday of each month, at 10.00 a.m.

A grant of \$300.00 in each ward was made for road work. Wages for road work were fixed as follows: For 8 hour day, man \$3.00 foreman \$3.50, man and 2 horses \$4.00 and man and 4 horses \$5.00.

Section 24-30-6, was leased to D. Sutherland; the S. and N. E. 12-28-5, were leased to E. Anderson; S.W. 27-30 5-4, was leased to T. Barker; The S.W. 7-30 5, was leased to Chas. McLean.

Financial Statement to March 8 was read and accepted and all accounts were paid.

Council adjourned to meet at the N.E. 13-30 5-4, on Saturday, April 1, 1933, at 10.00 a.m.

to 50 above (this afternoon). Snow and ice melted rapidly today under the sun's warm rays.

"Fresh from the Gardens"

Primary Cause Of Depression.

A recent address by Professor Gilbert E. Jackson, of the Department of Economics of the University of Toronto, delivered before the Empire Club of Toronto, has attracted wide attention throughout Canada, and deservedly so. It has been quoted on the floor of Parliament, and has been made the text of countless newspaper articles. Yet it dealt with a very simple subject, a subject as old as the human race—selfishness.

Thousands of sermons have been preached on this subject, books and discourses without number have been written with selfishness as the central theme, the law courts have been filled with cases arising out of selfishness, sorrow and trouble of all kinds have sprung from it all down through the ages. Nevertheless, Professor Jackson's address commands an immediate and large audience today because he deals with the all-prevailing world depression as having its basic cause in just this one thing—selfishness. And who is there who will say he is wrong?

Professor Jackson is an economist. He deals with cold facts and still colder figures. He is concerned with the actualities of life, with things material to our human well being. But when he has analysed all the factors, and sifted all the facts, and studied all the evidence pro and con relative to this world economic depression, he is forced to the conclusion that the basic trouble is, after all, not some man-made institution or system like banking or tariffs, that it is not over-production or under-production, but a condition of mind and heart of the average individual—his selfishness, avarice and greed, of which all these other things are but the natural and inevitable outcome.

So, Professor Jackson stressed the point that economic betterment must come primarily from a change of heart in the individual rather than merely by tinkering with economic machinery. From proposals that go deep into the heart of man and begin with his own conscience. "Looking back on the past four years I wonder," he said, "that the realization of these things has not brought forth a new religious movement."

It is not a new religious movement that is called for or necessary, but an action based upon acceptance of the fundamentals of Christian religion. The sermon on the Mount contains the whole and complete formula for the cure of the present depression, and the prevention of any depression in the future. It is not the formula of Capitalism, nor Socialism, nor Communism. It is the formula of the Golden Rule, acceptance and application of the principle of doing unto others as we would that others should do unto us.

What are these tariff barriers erected by all nations but an outward expression of the narrow nationalistic sentiment of individuals, and narrow nationalism is the outcome of the selfishness and greed of individuals. Tariffs are erected for the openly avowed purpose of selfishly promoting our own individual and national interests at the expense of loss and suffering by other individuals and nations. Selfishness and greed is the malnutrition of such actions.

And what is *laissez faire* as an instrument of economic warfare between nations, applied with equal truth and force to scores of other nations, and devised as man-made methods, schemes and systems, conceived in selfishness, nation, first of the individual, and through the individual or the community, the nation, and the world. And selfishness and greed of the individual is merely more openly expressed and multiplied when it takes the form of the selfishness of classes, communities and nations.

At the present time it is considered the popular thing to denounce the so-called "vested interests" as the embodiment of all the selfishness and greed in the world, and to declare because one class acts from selfish motives, desirable and evil motives, other classes should unite in order to act from exactly the same motives. Two wrongs do not and never did make a right, and the saving of the peninsula from one wrong to another wrong will remedy nothing, but only provide still more trouble, further grief, a greater growth of selfishness.

Those who today control finance and industry under the prevailing system have much to be accused of. They have been greedy and selfish and will be made to mend their ways, even if their hearts and desires remain unchanged. But the remedial method to be employed to that end is not to meet greed with greed, to oppose selfishness with more selfishness, to organize one set of interests against another and organizing set of interests. All greed and selfishness does not arise from greed for wealth or property. There is the greed for position, for power, for domination, for honors, for social distinction, for something, almost anything, the other fellow has and we have not. And how few individuals striving for these things are animated solely by a desire to possess and use them unselfishly for the benefit of others?

Professor Jackson is right, unquestionably so, when he declares that economic betterment must come primarily from a change of heart in the individual, and that word "individual" is all inclusive; it means the banker, the mortgage and loan executive, the railway head, the politician, the manufacturer, the merchant, the farmer—all of these, but it also includes the clerk, the artisan, the farm hand, the laborer. Mankind is in one lifeboat in the storm of this depression. They must pull together on the oars in unison, not at cross purposes. It is a case of one for all and all for one.

To change the metaphor, this is a time for building up, not tearing down. It is a time to risk all selfishness and greed for the common good. The man in debt must receive generous treatment and ample assistance at the hands of his creditors; equally so the creditor is entitled to and must receive proper recognition of his rights by the man who is indebted to him. The employer must make sacrifices in the interests of his employees; the employees must do likewise to help their employer.

In this economic crisis there is need for a great revival of that spirit of sacrifice and service which has been the chief credit of the Great War. The subordination of self in a complete readiness to assist one another in meeting and solving their problems in the unselfish spirit of the Golden Rule.

There are 250 labor unions among British government employees, some having only six members.

Imports from the United States into Greece are much larger than in 1931.

The first Jewish school in the Irish Free State is being built in Dublin.

Palpitation of the Heart Nerves Bad - Could Not Sleep

Mrs. Fred Bingham, Swift Current, Sask., writes: "I have been troubled with palpitation of the heart, and my nerves were so bad I could not sleep. I tried desperate and could find no relief. A friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and to my relief I would gladly recommend them to all who are troubled as I was."

For World Recovery

Address By Hon. H. W. Rowell Indicates Steps Needed To Be Taken

"It is clear that certain fundamental conditions must be considered before world recovery can be said to be in sight," Mr. Rowell said. "First, the question of international war debts and reparations must be finally and satisfactorily settled. Secondly, a solution of the disarmament problem must be found which is acceptable to both France and Germany as well as the other powers, and which will materially reduce the burden of taxation now resting upon the nations for the maintenance of armaments, and, above all, the suspicion and distrust which huge armaments engender. Thirdly, there must be an abandonment of the extreme economic nationalism which has characterized most countries of the world since the World War, and a return to sane and more normal conditions of trade.

"Tariffs must be reduced, restrictions on exchange must be modified, and the obstructions to the channels of international trade must be removed. Fourthly, some understanding must be arrived at among the nations of the world as to a common policy of currency and exchange, and if that common medium is to be gold there must be an international understanding which will, in a measure, restore the balance among the nations and prevent a repetition of the situation which has so interfered with international trade during the last few years."

"The prettiest rag rugs I ever saw"

"I feel I should share with you a wonderful compilation I had on my new rag rugs," writes an appreciative lady, who, however, is not a wealthy lady from the City of Quebec was visiting here and saw the rag rugs I had just finished. She was so enthusiastic said she had never seen such artistic ones, with such rich, lovely colors. She asked me if I could give her some. I gave her such beautiful color effects. When I told her I had dyed my own wools, she believed it. Of course I'm very proud of my rugs. Besides being beautiful, they are fast and washable." So the popular new art of making rag rugs is finding among the real values of Diamond Dyes for permanent dark colors by boiling. No other dyes make old materials look so new and bright, and, better, no other dyes contain so much of the finest aniline colors. For light dainty shades without heat, for lingerie, summer blouses and dresses, use the new dye. Besides being beautiful, all summer dyes have both Diamond Dyes and Diamond Tint.

Ontario Maples For West

Seedlings and Seeds Shipped To Winnipeg For Planting Transplanted from their native earth, select Ontario maples will in future grace Winnipeg's streets and avenues. When a consignment of maple seedlings and seeds received there attain full growth, other western Canadian cities also will be beautified in like manner.

Forerunner of many such shipments, a large consignment of seedlings has been received from the Thunder Bay region of Ontario and will be distributed throughout the west.

Officials of the department of agriculture state thousands of trees can be transplanted to the prairies at little cost.

No Argument

The Court was trying a case which had arisen out of a car accident. "You say you were half scared to death," said counsel for the defence. "I know very well I was," said the victim, with warmth. "Then," said counsel again, "how do you know it was a motor car, or that you were resembling a motor car?" "The victim looked angry at him. "It resembled one all right," he replied, "but was frankly struck by the resemblance."

Population in Texas

Now a state of 2,000,000 people, Texas has an average of 84 persons to the square mile, thus making it the most densely populated area in the United States. The Canadian figure is less than three and on the Ohioan lands there would be 3,036,320,000 people in this land.

The general industrial production index in Germany has risen from 92.3 to 95 since last summer.

May Be Empire Port

Halifax Strategically Situated To Become Great Flying Centre

Visions of Halifax as an important airport for the world were described by Prof. F. E. Plumber, who is secretary of the Union of South Africa government, visiting different countries, studying air policies and gathering data.

Prof. Plumber, who is professor of geography in the University of Pretoria, has spent three months studying conditions in United States and Canada. He stopped on his way to Liverpool, England, and visited the Halifax airport. He told Don Saunders, manager of the port, that he was greatly impressed with the activity of Halifax Aero Club.

"Halifax is strategically situated for development as a great flying centre," he said, and with the development that is bound to come in the next few years, which includes putting into effect a ship-to-shore air mail service and the establishment of cross-country air routes, Halifax ought to become an important empire airport."

Supplies From Britain

Imports Of New Products From The United Kingdom

Outstanding characteristics of the imports into Canada from the United Kingdom during the first nine months of the present fiscal year was the increase in many raw products that are to be finished in this country or to play some part in manufacture, said Mr. H. H. Stevens in a statement issued regarding trade with the United Kingdom.

"It is encouraging," said the minister of trade and commerce, "to note the diversity of these increasing demands for supplies from Great Britain."

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

Imperial Tobacco Company of Canada, Limited

Cannot Issue Special Coins

Government Has Refused Request City Of Toronto

In these days of discussion regarding stamp bills, flat money and other methods of raising Canada's share of the depression, it is interesting to note that the issue of money in any form of special coins is contrary to all British practice. None but the King may benefit by the issue of coins.

Some time ago it was suggested to Ottawa that the Canadian government authorize a special issue of 20-cent pieces in order that Toronto might facilitate the financing of the 1934 centennial celebration. It was estimated that a substantial profit might be realized in selling these at a premium over the counter to souvenir hunters and coin collectors. Mayor Stewart asked, of course, for a monopoly on the sale for the city of Toronto.

However, His Majesty's government, through Ottawa, has ruled that important as the occasion may be, such a precedent cannot be established in the case of Toronto, according to a report made to the centennial committee.

France Has Largest Gun

Throws One and Half Ton Shell Over Eleven Miles

Just to add spice to the disarmament discussions, it is announced that France has built the largest gun in the world. It is a 52-centimeter howitzer. That is a 20.4-inch calibre and is larger than the 18-inch naval piece which was built by Britain during the war and mounted on H.M.S. Furious and the monitor Lord Clive. Britain had discussed building a gun of 20-inch calibre, but it was never manufactured.

The new howitzer of the French can throw a shell weighing 5,080 pounds a distance of 11 1/2 miles. It is the largest gun in the world. It is a 52-centimeter howitzer. That is a 20.4-inch calibre and is larger than the 18-inch naval piece which was built by Britain during the war and mounted on H.M.S. Furious and the monitor Lord Clive. Britain had discussed building a gun of 20-inch calibre, but it was never manufactured.

Travelers Ask For Better Inspection Of Hotels In Saskatchewan

Pointing to the need for adequate inspection of Saskatchewan hotels to afford guests protection against fire, the members of the Canadian Travellers at their monthly luncheon in Saskatoon recently, declared that the province should favor of government action leading to the enforcement of existing regulations providing for fire escapes. It was the opinion of speakers that travellers, who were the largest class of country hotel users, were the proper individuals to request government action. The speakers stated that it was cited to show the dangers of hotels lacking fire escape equipment.

Linking National Parks Highway Between Jasper and Jasper Is Nearing Completion

Two of the largest and most attractive of the National Parks of Canada—Jasper National Park and Banff National Park, both in the province of Alberta, with an area of 4,200 square miles, the latter on an east slope of the Rocky Mountains, 2,586 square miles in area—will soon be linked by a 100-mile highway. When completed this highway will pass through the very heart of some of the most impressive scenery in the Rockies. The highway is being constructed by the National Park Branch of the Canadian Government which has administration over these and the national parks.

Since the establishment of the national parks over 500 miles of standard and gravel highways have been constructed, linking the parks with the main arteries of motor travel and opening up the outstanding beauty spots of these vast playgrounds.

Radium Worker Dead

Second One Of Five Facing Slow Death By Poisoning

Miss Katharine Schaub, one of the five women who brought suit against the United States Radium Corporation of Chicago in 1928, claiming their death was merely a matter of a few years as a result of radium poisoning, died last night in the city of Chicago, the second of the five to die.

Dr. Harrison S. Maitland, chief medical examiner of Essex County, was called to the autopsy and announced the cause of death as cancer of the left thigh, a disease directly attributable, he said, to the radium poison. The five women brought suit for \$200,000 each and won awards of \$400,000, free medical care and annuities of \$400. They were poisoned, it was held by Dr. Maitland, who wrote extensively on the subject at the time, by tipping with their tongues the points of brushes used to paint the dials of watches.

A new inexpensive high-speed alloy, composed of iron, tungsten and cobalt, has been developed for cutting steel.

Willow plantations started from twigs torn from England some years ago are to provide cricket bats in Australia.

W. N. U. 1935

U. S. PRESIDENT HAS EXTENDED BANK HOLIDAY

Washington. — By proclamation, President Roosevelt extended the modified United States banking holiday indefinitely, extending the powers conferred upon him by congress in emergency banking legislation which he had signed earlier.

The chief executive also proclaimed an extension of the embargo on gold.

All the provisions of the proclamation were continued in full force and effect. This meant also a renewal of the ban on hoarding.

The proclamation is to remain effective until ended by another proclamation.

"The national emergency still exists," read the decree, "and it is necessary to take further measure extending beyond March 9 in order to accomplish such purposes intended by the original proclamation of Sunday."

The president said, "All the terms and provisions of the March 9 proclamation and all regulations issued thereunder continue in full force and effect."

It is understood the purpose is to give the secretary of the treasury further time in which to administer the emergency banking law enacted recently by congress which would have permitted immediate reopening of sound banks.

Congress placed in President Roosevelt's hands the legislation he had asked to meet the United States banking emergency.

Final congressional approval came with passage by the senate after three hours' discussion which developed a bitter exchange between Senators Glas of Virginia, and Long of Louisiana. The latter said the measure offered inadequate protection to small banks.

Earlier, the House had approved the measure with the understanding debate, attesting the speed with which congress was functioning to meet the banking emergency.

The senate vote by roll call, was 73 to seven. House action was unanimous.

Cut Hollywood Salaries

Motion Picture Producers Feel Financial Pinch

Hollywood, Calif.—Cessation of all activities at all motion picture studios was declared today by the Association of Motion Picture Producers unless drastic cuts in salaries and wages for an eight-week period, due to the banking situation, were taken by all employers and artists.

For salaries more than \$50 weekly, a cut of 50 per cent. for the eight-week period would be made with a minimum salary of \$37.50 established. Those earning less than \$50 weekly would take a 25 per cent. cut with a minimum of \$15 a week. The cuts would be retroactive starting March 6.

Must Pay Legal Costs

Halifax Lawyer Awarded Judgment Against Veregin

Halifax, N.S.—J. J. Power, K.C., Halifax lawyer who argued in supreme court on behalf of Peter Veregin, has been awarded a judgment for \$681 against the Doubtboer leader. Costs of \$35 were added to the amount by Judge W. J. O'Hearn in his decision.

Shortly after Veregin was freed from the threat of deportation to Russia, litigation was opened on Mr. Power's behalf.

It is understood a settlement of the account will be made with little delay.

Break Up Parade

Vancouver, B.C.—A parade of several hundred women and some men who planned a demonstration in front of the city hall, was broken up and the participants dispersed by police. One man, Gus Carstrom, was struck on the head by a police baton during the melee and was removed to hospital for treatment.

Purchasing Radio System

Ottawa, Ont.—The Canadian radio broadcasting commission will purchase the radio broadcasting system of the Canadian National Railway. It was understood the sale would consist of three stations, one in Vancouver, the others in Ottawa and Montreal, N.B.

W. N. U. 1985

Board Of Censors

Plan To Form Joint Board In The West

Edmonton, Alberta.—Alberta is requested to join in forming a joint board of censors for the western provinces in a bill to amend the Theatre Act, introduced in the legislature by Premier J. E. Brownlee.

The proposal to create a joint board of censors for the west was made first in October, 1931, at an inter-provincial conference in Calgary. It was understood the plan was approved by all the provinces except British Columbia.

The proposal came up again at the interprovincial conference in Winnipeg this year and with introduction of such a bill in the Alberta legislature it is believed the plan proceeds plan to carry out the scheme.

The bill also empowers the Lieutenant-Governor-in-Council to require a proportion of the films shown in Alberta be of British making.

Vote Against Fighting

Victoria College Students Oppose Taking Up Arms For Country

Toronto, Ont.—Men and women students at Victoria College, by a majority of six, voted that this means of war, under any conditions, fight for its king and various nations, is against fighting.

About one-tenth of the 1,034 students registered at the college attended the debate. About half of these present were women. There were several unusual scenes. A white feather proffered by a girl student was enthusiastically accepted by the young men attending. The League of Nations was termed "half-baked idealism" and a "ghastly failure." Pacifism was called "a damnable sin by a co-ed."

Laws Should Be Uniform

Hon. R. J. Manion Advocates New Regulations For Truck Traffic

Ottawa, Ont.—Uniform regulations throughout Canada are needed for truck traffic in competition with railways. Hon. R. J. Manion declared in the House of Commons.

The railway minister indicated additional measures were being taken to make uniform regulations throughout Canada.

A questionnaire had been sent out, and when replies were received officials of the various provinces would probably be bringing at Ottawa with a view to arriving at some equitable scheme of taxation and fixation of rates for the buses and trucks.

Consigned To The Sea

Four Hundred Gallons Of Pure Alcohol Dumped In Harbor At Coast

Victoria, B.C.—Four hundred gallons of pure alcohol, valued at approximately \$10,000 went into the sea here today.

Officers of the Royal Canadian Mounted Police, on instructions from authorities at Ottawa, poured that quantity into the waters of Esquimalt harbor.

The liquor was seized by the Mounted Police last summer on board the American-owned gasoline launch "Advance," which was captured in the Gulf of Georgia on its way to the mainland.

Aids Empire Products

Schedule Introduced In Australia House To Reduce Duties

Canberra, Australia.—A schedule reducing substantially the duties on 31 commodities from empire exporters was introduced in the House by Liut-Col. T. W. White, Minister of Customs.

The bill represents the first instalment of application of articles from nine to 14 inclusive of the agreement between the imperial conference. The cuts reductions included in the bill introduced recently are on wool, felt, fur goods, hats, socks, stockings, wireless goods and rabbit traps.

Wheat Prices In France

Paris, France.—The price of wheat would be increased about 10 cents per bushel by a bill approved by the cabinet in which the price would be stabilized at approximately \$1.25 per bushel. Inferior wheat would be taken off the market and used for feeding.

Want British Destroyers

Canberra, Australia.—Prime Minister Joseph Lyons announces the Australian government is negotiating with the United Kingdom for replacement of destroyers in the Australian squadron by four destroyers of the latest type from the British navy.

Report Not Confirmed

Ex-Kaiser May Have Abandoned Claim To German Throne

London, Eng.—Any prospects of former Kaiser Wilhelm II, seeking to regain the throne of imperial Germany as a result of recent developments is stated to have vanished through the former sovereign's own act.

If the London Daily Mail's correspondent at Doorn, Holland, is accurately informed, Wilhelm Hohenzollern has completely and voluntarily abandoned the claim which he has often been credited—of again wielding power over his own people.

Instead he is reported seeking permission to spend his declining years in the privacy of his castle at Homburg Vor Der Höhe, the famous mineral spring resort in Hesse-Nassau. He was 74 years old in January.

Any anxiety the ex-kaiser may feel concerning the attitude of his sons toward his declining years of claims to the throne were reported removed by a kind of contradictory statement of abdication. At a recent family council in Doorn, the sons were reported to have turned over all their "rights" to the throne to the ex-prince for his disposal.

Hit By Financial Crisis

Former Kaiser May Lose Money As Result Of U.S. Situation

London, Eng.—The former German Kaiser probably will be obliged to cut his household expenses as a result of the financial situation in the United States.

Mal's Doorn correspondent reported, Wilhelm also was said by the reporter to be anxiously watching fluctuations of the Dutch florin, which would make him comparatively poor.

MARSHAL CHANG RESIGNS HIS POST AS COMMANDER

Peiping, China.—Thirty-five-year-old Marshal Chang Hsiao-Liang, who resigned as commander-in-chief of the Chinese armies operating against the Japanese in Manchuria, has resigned to the government he considered himself unfit to command.

His resignation covered a long period of criticism of his administration of the Chinese defense forces which, since September, 1931, have been almost steadily withdrawing before the Japanese. In a telegram to the Nanking government the young marshal said:

"After the loss of the three eastern provinces (comprising Manchuria), I tried my best to remove the fault but the fall of Jehol convinced me I am unfit to keep command."

Chang succeeded his father, the late Marshal Chang Tze-Lin, as warlord of Manchuria in 1928.

Peiping, China.—The arrest and execution by the Chinese of General Zhang Yulin, who governed the province of Jehol until that territory was taken over by the Japanese, was reported here today.

A reliable source said General Zhang had been seized at Hsiao-Engkow, a pass through the Great Wall. Troops of Marshal Chang Hsiao-Liang, who had just resigned as the principal North China military commander, made the arrest, it was said.

FIRST MATE BECOMES K.C.

London Daily Mail Thinks Canada's Intention Is "Wise Step"

London, Eng.—The Daily Mail, Conservative organ, described the alleged intention of the Canadian government to ask parliament for extraordinary powers in the matters of finance as a "very wise and timely step."

"There are many factors," it continued, "which must operate strongly in Canada's favor. Her banking system is free from many of the weaknesses which brought difficulties elsewhere. She has not a multitude of small mutually competitive banks but a close co-operation between 11 large banks under the Bankers' Association."

The Daily Mail refers to the report the government would ask parliament to invest it with all the powers conferred by the "peace order and good government" clause of the constitution. This clause would give the government power to initiate primary legislation on any measure thought necessary to the welfare and stability of the Dominion.

The King has approved the appointment of Mr. Lewis Nod to be King's Counsel. Mr. Nod, in his youth, sailed on liners between London and the Pacific and obtained his first Mate's certificate. Being unwilling to be a barrister, he has risen to be a successful junior counsel in the Admiralty and a Lloyd's salvage arbitrator.

Political Disturbances

Foreign Correspondents In Germany Face Expulsion Measures

Berlin, Germany.—Five persons were killed and several injured in political disturbances in four German cities.

In Breslau, one Nazi was killed and five wounded when shots were fired from trade-union headquarters by a group of 250 brown-shirted marchers.

Two Nazis were killed and six injured when a funeral procession in Düsseldorf was fired upon. In Wuppertal a Reichsbanner man was killed by unidentified assailants.

A Communist leader was found shot to death on a street in Duisburg, while a worker was seriously injured in his home by an unidentified person.

Foreign correspondents in Germany have been warned that expulsion measures are being prepared to apply to those who have "persistently" misrepresented the international situation.

Discuss Railway Problems

Diverse Opinions Heard In Ottawa Debate

Ottawa, Ont.—Joint operation of the Canadian National and Canadian Pacific Railways was termed the only lasting solution to transportation problems, by Dr. Peter McGibbon, Minister of Munitions, in the House of Commons.

From the other side of the House, Hon. Peter Hoeman, former Liberal Minister of Labor, attacked the government legislation implementing the recommendations of the Duff commission on transportation on the ground it would establish exactly what Dr. McGibbon advocated—joint operation of the railways.

To Help British Farmers London, Eng.—Major Walter Elliot, Minister of Agriculture, introduced in the House of Commons a bill designed to re-organize British agriculture and bring prices of British farm products to a remunerative level. It would empower the government to protect organized markets by regulation of imports through quotas or other means from any food of overseas imports.

Approves Financial Move

London Daily Mail Thinks Canada's Intention Is "Wise Step"

A MEASURE TO REPEAL THE BAN ON SWEEPSTAKES

Ottawa, Ont.—Sweepstakes for political and charitable purposes are being legalized in Canada by a bill introduced in the senate by Senator A. D. McRae, of Vancouver, becomes law. It is the Vancouver senator's first attempt to repeal the ban on this type of large scale gambling. He introduced a similar bill last year, but failed to get it through.

Public feeling was now in favor of regularized sweepstakes, Senator McRae said. In Vancouver 75 per cent. of the voters at a plebiscite last year supported government controlled sweepstakes. The British Columbia Hospital Association had voted in favor of them and the Union of British Columbia Municipalities had endorsed the idea.

The object of the bill is to authorize the provinces to permit the conduct of sweepstakes in their territories, not by any group of citizens, but only by a committee authorized by the attorney-general, who would direct the scheme. The money would be devoted to the welfare of the sick, the destitute and the maimed.

The bill expressly forbids the advertising of a sweepstakes outside the province in which it is being conducted. The appointment of agents for the sale of tickets outside the province.

Sensor MacRae said in 1931, the Irish hospitals received from the three sweepstakes, more than £2,000,000. In 1932, according to a cable he received recently from Ireland three sweepstakes had grossed over £1,000,000. They gave away in prizes £750,000 and the expenses were £1,000,000.

As to the moral question involved, the churches in Ireland had voiced no disapproval of the holding of sweepstakes. And all churches in Ireland were the same thing on a small scale.

Sensor MacRae outlined the serious situation of the hospitals and other charitable institutions in Canada. The Vancouver hospital for instance, owed \$270,000 to the bank, and had no money to pay it. Other institutions were in like predicament. He closed with an urgent plea for the passage of his bill.

MAY DECIDE RAIL AMALGAMATION BY PLEBISCITE

Ottawa, Ont.—Canadian people at the next general election may have the opportunity to decide by plebiscite whether the Canadian National and Canadian Pacific railways shall be amalgamated, Premier R. B. Bennett estimated today in the House of Commons.

Amalgamation was guarded against in the government's railway legislation on the report of the Duff commission on transportation, the Prime Minister said.

But the Canadian National was a bankrupt enterprise, eating into the financial vitals of the country. The purpose of establishing a board of three trustees to manage the government railways was to put a relationship with wide and extraordinary powers in an effort to put it back on its feet.

"There is no thought of any trick to bring about something to which we have pledged ourselves not to do," said Mr. Bennett, referring to amalgamation. Conservatives and Liberals pounded their desks.

The large crowd in the gallery cheered their seats in mute approval. "There is no amalgamation behind the amalgamation of these systems when parliament is opposed by the people," he said, "and it is possible to bring about the amalgamation of these railways on any terms or conditions unless the people themselves had the opportunity to declare. I have given much thought to the point as to whether or not the honest and proper method to pursue is to afford an opportunity at the next general election by plebiscite for the people to determine whether or not they are desirous this should happen."

Asia's Rural Population

Hardships Endured By Tillers Of Soil Gradually Growing Worse

Rev. Dr. James Dandridge wrote in a recent issue of the *New Outlook*: In China there are about three hundred millions of farm folk—one-half of them married women and girls; that is, there are from seventy to eighty-five per cent. of China's population is rural. Africa, of course, is predominantly rural. In India, one vast rural area in Japan there are some ten thousand farm villages with over five and one-half millions of farm homes. About seventy per cent. of the total population in Japan live and work in rural territory; this in spite of the fact of the enormous growth and development of city life in Japan during the last half century. India is primarily a land of small villages and tiny hamlets. According to the census of 1921 the total population of India, including all the Indian States and Burma, was a little over 318,000,000. Over 250,000,000 of these live in rural communities. In each of these countries the hardships endured are nothing short of tragic, and are steadily growing worse. In this connection, competent investigators are as one. The tillers of the soil throughout Asia, perhaps beyond all others in the world, are receiving cumulatively smaller returns from their labor, are being taxed increasingly and are crowded almost beyond endurance under the growing weight of indebtedness. For hundreds of millions the condition is little better than serfdom.

Woman Dentist In North

Itinerant Worker Has Spent Four Years Treating Eskimos
The north's only itinerant dentist is a youthful-faced, silver-haired woman, Dr. Edna N. Tavel. She is engaged to be a missionary after graduating from dentistry. She combined the two and is now one of the best known friends of the Eskimo people.
Dr. Tavel travels constantly by aeroplane, dog team, boat and foot, from one government school to another, treating Eskimo children and grownups for bad teeth. She is an employee of the department of the interior with the government medical service.

"The natives are greatly in need of medical and dental care," Mrs. Tavel said. "Their unsatisfactory condition, combined with the rigorous climate and lack of dental knowledge leave their teeth in bad condition."
Dr. Tavel has spent four years in the north, many times battling storms and bad weather to aid the Eskimos. She has a son, Carlos, a student in the University of Washington.

History Of English Race

Winston Churchill Accepts \$100,000 From Publishers For Copyright

Winston Churchill, literary stylist, as well as statesman, has signed an agreement with publishers to write a 400,000-word history of English-speaking people. It will take five years, and in his narrative literary undertaking to date. The publishers are paying \$100,000 for the copyright.
This is not the largest fee, including royalties, received by an author, but as a single payment in purchase of a work entitled it ranks among the highest. Lord Maxwell, for example, received a like sum for his famous *History of England*.

Statue Needs Cleaning

The grimy Nelson statue in Trafalgar Square, London, badly needs a bath. But the British Admiralty has no money for such luxuries. The statue has not been cleaned since 1919. The process costs about \$2,000. His statue of London grins is thick, thick now, and steeples eventually will have to dust him off with chains.

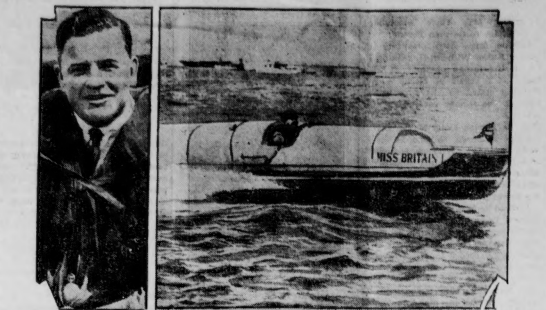

Momentum To Apple Tree

A monument to an apple tree is to be erected at Edenwold, Canada, to commemorate the discovery of Australia's finest desert apple, the Grassy Smith. Seventy-five years ago a widow, Granny Smith had a small apple orchard and there, from some discarded pit, grew the first Grassy Smith apple tree. The tree and its offspring earned a fortune for the widow.

Corillas often reach a height of six feet and have a reach of eight feet.
Galway, Ireland, has dropped its fight against non-Irish games.

W. N. O. 1925

THE LATEST BRITISH CHALLENGER FOR HARMSWORTH TROPHY

In another attempt to wrest speedboat supremacy from Gar Wood, the Royal Motor Yacht Club of England recently named Hubert Scott-Payne, well-known British boat designer and builder, as its entrant in the international race for the Harmsworth Trophy this year. The trophy, emblematic of the world's speediest championship, is now held by Gar Wood, veteran racer of the United States. Above, Scott-Payne is shown in a close-up at the helm, driving one of his power boats at right. The British challenger will use a specially-designed boat, *Miss Britain III*, in the Harmsworth race, which will be held in September.

Mail Claves In Skyscrapers

Letters Traveled At High Rate Of Speed

If you drop a small envelope containing one sheet of ordinary letter paper in the opening of the mail chute on the eighth floor of the Empire State Building, New York, it will drop downward one thousand feet at an average speed of 124 feet per second, or nine miles per hour, arriving in the mailbox at the bottom of the chute in one minute and thirteen seconds. If you drop a large envelope with two sheets of paper, it will travel at a rate of twenty-one feet per second, or thirteen miles per hour, and get there quicker still. If it's speed you want, you can get it all the better action at the Chalmers Building, where, although the distance is considerably less, a large envelope containing five contract forms and one sheet of letter paper will do approximately forty-three miles an hour. Galileo's law, that the speed of falling bodies increases with the distance traveled, does not apply to mail descending in a mail chute. There is no danger of a letter igniting or getting stuck in a long descent, as some irresponsible writers once wrote. The reason is that the mail chute people utilize a natural up-draftlike that of a chimney, in their chutes to slow down falling mail. Thus the letters go down rather less surely and don't catch fire. At the bottom, they strike a smooth, curved bronze plate which slows them down greatly and deflects them against a leather cushion hanging vertically. From this, they drop gently into the mailbox proper, unhurt.

Some Curious Cargoes

Strange Things Seen In Tour Of London's Dockland

Seen during a tour of London's dockland:
Kangaroo bats from Australia and reindeer tongues from Canada—they are used for soup.
Fifty tons of sea water brought in a tank in a barge from the sea off the south of France. It is for the London Zoo, and contains organisms particularly pleasing to tropical fish. Twenty boxes of what look like city bootlaces. These were vanilla "beans" from Seychelles, West Africa.
Gum benzoin in tin Sunbats for lung trouble, dried thushar roots from China, shark oil from Yokohama, mushroom oil from Leningrad.

Educating Canada's Indian Wards

The Department of Indian Affairs reports that during the year 1921-22 there were 80 residential schools and 270 day schools in operation, a total of 350 centres of Indian educational activity in the Dominion. In the management of the residential schools, the Roman Catholic Church of England, United, and Presbyterian churches co-operate with the Department.

The Vicar (appealing from the pulpit on behalf of the Christmas dinner fund)—"What we want, my friends, is not abstract sympathy, but concrete plum puddings!"

British railways handled 140,000,000 parcel post packages last year.

Canadian Red Clover

Superiority Of Seed Has Been Proved In British Markets

Canadian Red Clover seed is well received in the British market, where it has demonstrated its superiority to clovers from other countries. A leading Scottish seed firm which pays particular attention to the securing and distribution of the best strains of clover crops describes Canadian Red clover, which is offered as an early strain of Broad-leaved Red, as extremely hardy and invariably giving the best results in trials at the West of Scotland College. In the firm's catalogue is a striking illustration showing plots of various strains of clover grown for comparison. In this the growth and hardness of the Canadian type is noticeably better than that of the English and remarkably superior to the Polish and Chilean varieties.

An Economy Measure

Alberta Government To Close Down Normal School In June

As an economy measure, the Alberta government will close the \$600,000 Normal school in Edmonton and the \$100,000 school at Vermilion at the end of June, according to an official announcement by Premier John Brownlee.

Normal school estimates introduced in the legislature provide \$10,425 to meet teachers' salaries until the end of June.
Present conditions, Mr. Brownlee said, make this step necessary. If there is any improvement shown when June arrives, the government may consider its decision.

Sugar Beet Production

The latest available returns for the complete production of sugar beets in Canada are those for 1921 when the harvest was 435,992 tons. The highest previous figure was 397,676 tons in 1920, and the next highest 370,047 tons in 1919. The total acreage for the Dominion in 1921 was 43,327 acres compared with 46,552 acres in 1920 and 51,993 in 1925.

The mushroom is very sensitive to changes of temperature and to moisture.

Rayon production in Italy last year was nearly equal to that of 1921.

The Term "Lynch Law"

Author Talks Of Episode From Which It Originated

In that very interesting volume entitled "In Search of Ireland," the author tells this story:
A very dignified magistrate named Lynch in a certain part of Ireland many years ago, had a son who was a bit of a wit, as we would say today. This young man had as his guest for a time a young Spaniard about the same age, and they appeared to be enjoying life, until one day the young Irishman discovered that the visitor was cheating a little with his best girl, so impetuously he killed his guest and threw the body into the lake. The elder Lynch, being a magistrate with greater powers than our magistrates have, tried his son and condemned him to be hanged. No person could be found in the district to carry out the execution, so the father grudgingly did it himself. The story says that the old man was so heart-broken that immediately after the execution of his son he retired to his own home and was never seen afterwards.

Thus from this episode came the term "lynch law."

Was a Wealthy Knight

Father Of Dick Whittington Made Fortune As Silk Merchant

Who invented Dick Whittington's imaginary adventures is not known. In the year 1360, generations after his death, a play which has long since been lost was licensed for performance. It was "The Histories of Richard Whittington." Of his history, his great fortune, Dick who was never Sir Richard, was the son of a wealthy knight of Gloucestershire, a seven-hundred-year-old English knight, probably the oldest extant. During the Great War both of them, as well as other previous owners, were withdrawn from the now famous Sadlerian Konevi library at Konia with a view to protecting them against theft. Later on they were sent to the Constantinople Evke Museum, but it now appears that they never reached their destination. The carpet is said to have a commercial value of \$250,000.

Many large office buildings are being constructed in Rio de Janeiro, Brazil.

A newspaper plant to be erected in England will cost \$1,250,000.

Oldest Regiment In World

Honorable Artillery Company Was Founded In 1537

Following the death of the Earl of Denbigh who commanded the Honorable Artillery Company of London, England, for forty years, Lord Galloway, an ex-officer of the H. Guards, has been named his successor. A proud honor it is because the H.A.C. as it is known to Londoners, is the oldest regiment in the world. It was founded in 1537 when Henry the eighth granted a charter to the Guild of St. George to encourage the science of artillery. But artillery at that time simply meant bows and arrows and "handguns," whatever the hand guns of 1537 were like. Since 1641 the armories of the H.A.C. have stood in Bunhill Fields within the City of London, near the cemetery in which John Bunyan is buried. The then Prince of Wales, afterwards Charles the Second, joined it as an officer, and since then either the reigning King or Prince of Wales has been an officer in command of a company.

Although an artillery regiment it has also an infantry battalion, and membership requires that the applicant be something of a soldier. Many wealthy men serve as privates. During the World War it had a noble record. Altogether 12,848 men served in the H.A.C. How much was in the thick of the fighting is gathered by the fact that of that number 5,961 were either killed, died of sickness or wounded. It won 12 decorations for bravery, including two V.C.'s, and over 4,000 men obtained commissions. —St. Thomas Times-Journal.

A Splendid Spirit

Saskatchewan Medics Prepared To Cut Bills For Rural Municipal Councils

The Saskatchewan Medical Association is prepared that bills owing its members by rural municipal councils for services rendered indicate such should be cut in half. Here is a proposal suggestive of generosity and a willingness to share the common sacrifice.

The medical profession has been as patient as a saint in the depression. There are as many as ever, and maybe more, and they have to be attended to. But not a little money in the decision communicated to the council of the Saskatchewan Association of Rural Municipalities reflects a good spirit.—Regina Leader-Post.

Valuable Carpet Lost

Turkey Is Searching For Relic Value At \$250,000

Turkish public opinion is busily engaged in guessing what has become of the most valuable relic of the past that Turkey possesses, a mantle belonging to the famous Arab philosopher, Muhyiddin al Arabi, an eleven-hundred-year-old English carpet, probably the oldest extant. During the Great War both of them, as well as other previous owners, were withdrawn from the now famous Sadlerian Konevi library at Konia with a view to protecting them against theft. Later on they were sent to the Constantinople Evke Museum, but it now appears that they never reached their destination. The carpet is said to have a commercial value of \$250,000.

Book Printed On Tin

Filippo Tommaso Marinetti, author famed as the father of futurism, has tried something new—a book printed on tin. "Liberty," said the author, "is too sacred a word to be printed on paper. It demands a metallic elasticity." The pages are of very light, bendable white tin. The printing is in black. Illustrations are in brilliant tints.

Agricultural Asks

Farming is actually done by agricultural ants on a small scale. They cultivate patches of wild rice, keeping out weeds until the crop ripens. They then climb the stalks and carry the grain away to their underground granaries.

Government Aids Coal Industry

The government has paid approximately \$1,674,084 from 1928 up to the end of 1932 in connection with the movement of 2,082,165 tons of domestic coal from mines to markets in Canada.

Business in Portugal has greatly improved as the result of large 1932 crops.

Biscuit is a French word which signifies "twice cooked."

Gardening Notes

By Gordon Lindsay Smith

The first thing to go to and the first to be ready for this time are those of which the leaves are eaten; spinach, lettuce, cress and such things. Peas also go well with the early garden. Lettuce. If we choose several types, early, medium and late, and sow two or three times, ten days apart, we can lengthen the season amazingly. Where possible, add a few things new, something never tried before and in a few years you will have just as extensive and interesting a vegetable garden as the flowers. We must remember that quick growth and tender growth. A check caused through dry weather or frost of cultivation will turn our roots into tough, inedible. Get away from the old idea that only three or four vegetables can be grown in Canada and that these should all be planted in one day. We can have a good garden from sowings made in April and we can also achieve wonderful results if for some reason or other we do not get anything in before the first of July, but we can have better returns still by sowing a little of something very week from the time the soil first crumbles if squired in the hand in each week. The first stream of good things.

For your convenience, the following list of vegetables is given. It is recommended: Asparagus—Mary Washington; Beans—Early Wonder, Flat Top, Round Pod Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Beets—Early Wonder, Flat Top and Detroit Dark Red; Broccoli—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early Wonder, Flat Top and Detroit Dark Red; Cucumber—Golden Acre as a round-headed first early, followed by Copenhagen Market and Copenhagen Glory as mid season; Cauliflower—Snowdrift; Carrots—Early Wonder, Round Pot Kidney Wax, Stringless Green Pod, with Kentucky Wonder and Kentucky Wonder for sole crops; Cabbage—Early

High Commissioner's Office In London Sends a Warning Note About Cattle Export Trade

Too much importance cannot be placed upon the suggestion made in the following paragraphs from a report based on a thorough investigation by the High Commissioner's office of the situation in regard to export cattle trade. A note of warning which we cannot afford to ignore is quite apparent in these paragraphs, which should be placed before every person interested in avoiding any action which might tend to jeopardize the development of our export cattle trade in Great Britain.

"It is now generally recognized that there has been an improved section of the export trade in recent years, and that the price here has spread accordingly. Dealers and buyers are peculiarly sensitive to disappointment when the standard of excellence drops in any of the sales. The burden of returning a reasonably good price for common sorts of livestock imposes a difficult tax on commonness, and consignees appreciate the adverse effect on business of unfavourable price returns. Constantly they are telling the shippers that the trade wants and urges them, diplomatically, to choose export cattle carefully for type, weight, age and conformation. But the cattle trade, being rather more assiduously, lends itself more readily to harassing experiences than does the trade in stores.

"Our healthy heifers and cows have been talked of and written about frequently. There has been created an atmosphere of hopeful expectancy. The value of goodwill is an additional consideration. Its place in the respective sections of the British trade is high, and this should be weighed carefully by the Canadian shippers.

"It is not possible to forecast whether or not cows will be suitable for breeding and dairy purposes, can be selected and shipped to advantage. That will be determined only by trial and experience. However, the trade demand for suitable stock is the more preferable and prudent policy; over-feeding it with common sorts, especially at the moment, will stunt, and may even harm, a Canadian export trade.

"The Canadian selected Canada for breeding of dairy purposes in Great Britain, and lacking the characteristics fitting to the ideas and needs of the people specializing in these particular activities, will not find buyers, except at uneconomic prices. Experience of this sort will show that, in addition to uneconomic prices, a wrong impression in Great Britain of the value and usefulness of our stock, a condition of affairs which producers and shippers considerable money, and one that will be difficult to correct. The same thing applies to our sheep going into the market.

"Such a result, if it were possible to forestall, should not be risked or permitted. Even extreme precautions to safeguard the export trade of new opportunity, could be justified. Furthermore, I misjudge the trade here if they would not support concentrated action, at the outset, to attain this desirable objective.

"For the general guidance of shippers who are considering the possibilities of serving the dairy industry with either heifers or springer cows, freshening three or four weeks after landing, the great majority of the dairy farmers prefer a good size animal, which, of course, should possess milking qualities and conformation. The breeds most favored are cross Shorthorns or crosses out of Horns and Ayrshires by a Shorthorn bull. Pure bred Ayrshires or Holsteins are not favoured unless they are of a top class. The dairy Shorthorn type and size is what dairymen have in mind.

"One dealer suggests that 'Shippers should give the fullest information as to probable dates of calving; what kind of sire produces the calf; what age the cow is—whether first, second or third calf. We would recommend cows about four to five years old, carrying second or third calf. First calf cows would sell at a low, owing to the prospect of smaller milk volume during first calf period.'

"The first choice in Scotland, for buyers for best breeding purposes, is well bred Angus or their crosses. Shorthorns are second. Herefords are not popular. In England, the Hereford takes a better sale.

"Realizing and sustaining positive results in building our cattle business will depend very largely upon the direction and conduct of the

initial efforts in the new field of market.

Common sense should convince us that the points made in the above paragraphs are well taken, and that all concerned would do well to exercise every reasonable precaution in respect to volume and quality of cattle exported to the United Kingdom. If, however, further proof is necessary, nothing could be more appropriate than the following statement from a letter dated February 17th from the Animal Products Trade Commission in London to the Dominion Live Stock Branch, Ottawa, in respect to a recent shipment sold at Billy Graham's sale.

"The cows, whether or not they were intended for slaughter or milking, were unsuitable for either purpose. None of the buyers was interested to the extent of tendering a bid. Usually what happens with the sale of such animals is that they are left with the consignee until he can manage to find a buyer. The consignee is to be feared that the costs to the shippers for holding the cattle are accumulating out of proportion to the chance of getting a satisfactory price; consequently, in his interests, the sale is concluded mostly at the buyer's figure, and for the very good reason that, although they are unsuitable for the meat trade here, is nevertheless, no alternative outlet."

"The consignee, to conviction, we can do nothing better, in concluding this statement, than quote from a letter received from one who has, for more than a quarter of a century, been active in the United Kingdom market.

"You may advise any inquirers that the cattle are not wanted, and it would be very foolish to put the cost of shipping on common cattle. It costs just as much to ship and sell a good one as a poor one. England wants only well bred cattle in good condition."

Learning To Fly

Mexican Tree Frog Can Drop Slowly From Great Heights

A Mexican tree frog that appears to be learning to fly is described by Dr. Remington Kellogg, of the United States National Museum. The frog, says Kellogg, has adopted a jumping habit, and has been known to leap and alight without injury a height of 140 feet. Dr. Kellogg has conducted a number of experiments to test its powers of flight. When he dropped one from a high water tower he said it immediately sprang out its limbs and sailed down slowly at an angle, landing unharmed about ninety feet from the base of the tower. There appeared to be no further acceleration after the frog had fallen about twelve feet, he said. At other times, Dr. Kellogg has tried throwing these frogs into the air. Each time he did so, he said, they always managed by violent struggling to get into a balanced position and glide to the ground unharmed.

Larger Than Big Ben

Par-famed "Big Ben" has been eclipsed in size by two other clocks in London. First an official building erected on an office building surpassing "Big Ben" in size, and now a company manufacturing medicines has put up a still larger one over Trafalgar Square.

Americans purchase \$30,000,000 worth of fraudulent stocks each week.

WIND AND STORM SWEEP LINEER ON TO SANBANK

Above we see the trans-Atlantic liner "Montrose" being pulled off a sandbank on Arksey Spit, near Liverpool, after all the passengers had been rescued and taken to Liverpool. The "Montrose" was only one hour from her destination when the high wind proved too much for her and she was forced high and dry on the treacherous sandbank. Fortunately no damage was done to the liner and the passengers suffered very little inconvenience.

Plenty Of Reading Matter

Convicts In Canadian Prisons Supply Books and Periodicals

Whoever he may lack in the apportionment of life, the convict in a Canadian penitentiary need not go without his reading. A bulletin of the Dominion Bureau of Statistics makes this plain. In one recent penitentiary, at the time this survey was made, were 3,745 convicts, and in the seven libraries were 48,312 volumes; to wit: an average of 54 periodicals. The expenditure per prisoner for books and periodicals was \$1.81 in 1921.

The largest library is in Kingston, where 19,463 volumes are at the disposal of Col. McLaughlin's "guests," or 24 per prisoner. The smallest is at New Westminster, B.C., where the average is but four books per prisoner. On the other hand Dorchester, N.B., boasts all with 54 periodicals, and at Billy Graham's sale.

"These statistics are interesting, but they leave the best part of the story untold. One should like to know the extent to which prison libraries are used by convicts, the sort of reading done in the penitentiaries. Is fiction the favorite, and what type of fiction? Do they prefer romance and sustained effort at mental improvement through technical and instructive works? Do prisoners fancy the detective story? Do they prefer romance with a happy ending?"

Probably their tastes are about the same as those of any equal group of men outside the walls.—Ottawa Journal.

Novel Device For Students

Signal Censures Turky and Welcomes

Punctual Ones At Lectures

A novel device for welcoming students to lectures and censuring tardy ones has been introduced by Dr. G. M. Shrum of the department of physics, University of British Columbia. A "welcome" sign, vividly outlined in green, greets prisoners as they enter the lecture room, and an automatic counting machine registers his attendance. Late-comers, however, are reminded of the fact by the ringing of bells and the sign "Late again." The signal changes are controlled by the professor behind his desk.

A beam of invisible ultra-violet light, which is cut by each student as he enters the room, in the beams of the invention. The effect of the interrupted beam of light on a photo-electric cell causes the ringing of bells and the counting of each entrant.

Sense Of Humor Left

And Most Western Farmers Still Possess Their Optimism

The National Revenue Review gives the following as the answer made by a prairie farmer to an inquiry by an inspector who enquired about his income over a period of years:

"You asked about my crop for the last five years; well, I'll tell you. In 1924 I was dried out; in 1925 I was hauled out; in 1926 I was frozen out, and in 1928 I just walked out, and I'm still out."

Notwithstanding it all, this farmer seems to have retained his sense of humor, and, as he is a westerner, we are also willing to stake that he continues to possess an abundant stock of optimism.—Brookville Times.

Soap should never be used on white silk. It should be dissolved in water before laundering is begun.

Chinese Women Going Through For Medicine

Large Percentage Of Students Eager To Become Doctors

Dr. Josephine Carrier Lawrence, of Shanghai, was the only woman doctor elected to fellowship in the American College of Physicians last year. She is dean of the hospital of the Women's Christian Medical College in Shanghai and all her staff are Chinese. She trains young men and women as doctors and nurses and oversees a hospital of more than 200 beds.

Interviewed at Montreal when attending the annual clinical session of the American College of Physicians Dr. Lawrence said: "It is interesting to know that more than 19 per cent of Chinese women students at colleges in China are going through for medicine in comparison to four per cent of women students in American colleges. Chinese women are more eager to learn than their western sisters."

"In their country traditionally a doctor's status is very high and as the background of Chinese life is philosophy they are intrigued and interested in science, which is completely new to them. They speak English language so they may study. They retain Chinese dress as more becoming. They take up medicine because it is so much needed. A Chinese girl student or doctor is on the same footing with a man. Her learning makes her his equal."

Dr. Lawrence will spend one year on this continent to learn the latest discoveries in medicine and then will return to the east.

Lack Of Phosphorus Causes Tooth Decay

According To Results Of Experiments

By Dr. Agnew

Tooth decay is primarily due to lack of phosphorus and Vitamin "D" in the diet, according to the results of research made by Dr. H. G. Agnew of the West China Union University. Working with hundreds of laboratory animals, Dr. Agnew was able to produce tooth decay in practically all the cases by depriving them of these two food elements.

Eating sugar, candy, and other sweets, which has further effect by these test diets, has not induced in guinea pigs tooth decay, except that by satisfying the appetite food-eaters led to keep down the intake of the foods which contain the elements which do make for sound teeth structure.

Dr. Agnew says that among the Chinese tribes in particular, where tooth decay is especially infrequent while their diet is highly restricted, the eating of whole corn, an important article of their daily food, supplies them with adequate phosphorus while their out of door life in the sunshine assures them of plenty of Vitamin "D."

Qualified For Entry

A very sleek-looking old man presented himself at a hospital for cats and dogs, and asked to be taken in.

"You can't come in here," he was told.

"Oh, yes, I can," he protested. "I'm an old soldier."

"But, my good man, you can't. This is a veterinary hospital."

"That's right," answered the old man solemnly. "I'm a veteran."

Of the 2,000 known kinds of germs and bacteria, only about 100 are believed to be harmful. The other 1,900 varieties are necessary to life in one manner or another.

Glasgow, Scotland, shipyards are receiving orders for freight steamers.

Northwest Company Operates Furthest North Petroleum Well In The Great Bear Lake District

Value Of Life Insurance

Interesting Statement Made By Hon.

Hon. Charles A. Dunning, former Canadian finance minister, made an interesting statement with respect to life insurance in his annual address as president of the Ontario Equitable Life when he said: "Life insurance as an institution is at once the greatest debtor and the greatest creditor in Canada; the greatest Canadian debtor because its contracts to pay are larger in volume than any other in our national structure; the greatest Canadian creditor because it has accumulated in small amounts with respect to the five million lives insured over two and one-quarter billion dollars, which it has loaned to governments, municipalities, school districts, railways, utilities, industries, and policyholders, and also on mortgage."

—Toronto Star Weekly.

How To Eat Oysters

Prince Of Wales Receives Pointer From An Authority

"What is the proper way to eat oysters?" asked the Prince of Wales recently, when seven-year-old oysters fresh from their native beds, were laid before him at an oyster farm, "Should I take vinegar or not pepper, or both?" he asked. The manager replied: "Never, sir, the best way is to 'eat them clean.' Then you get the true seawater flavor."

By Ruth Rogers

The "miserable" depicts about "The east of Great Bear Lake" were discovered, developed, and there was a demand for gasoline and fuel oil. Great Bear Lake empties into the Mackenzie River through Great Bear River, at the mouth of which later Norman is situated. "The Northwest Company," which has been comparatively speaking, next door to its customers, with water transportation (except one portage across a strait) and Great Bear River (from the well to the east end of Great Bear Lake). The Northwest Company, which brought in a small amount of gasoline in 1921, opened this up in the spring of 1922 and supplied gasoline and fuel oil for running motor boats and engines in the mining camp. It was up on this production that the royalty was paid, and while the output so far has been relatively small, this commercial use of northern oil is both a fulfillment of well grounded predictions of ten years ago and a promise of greater things to come.

Newsboys Are Quick

Can Tell Nationality Of Customer's By Their Shoes

Americans occasionally when travelling in England like to be taken for Americans. It is a small group in Cleveland, traveler, was in London, where he got himself a complete English outfit—hat, hat, linen, gloves, most satisfactory.

Dressed in the outfit, he walked out to the steps of his hotel and stored there a moment, contemplating the weather. Just then a newsboy, almost a block away, came dashing toward him crying.

New York Herald—here you are!

It was a wonder of foreign newspapers in Paris who told the secret of his skill in spotting the nationality of prospective customers. It is at their shoes," said he.

CHAPTER VII.—Continued

In his cabin, with the steamer
tumbling on toward Steel-Ed, Alan
wondered what Joyce's reaction would
be if he should go to her and frankly
tell her about that tragic incident in
his life which had brought about his
engagement to Elizabeth. Joyce
would understand his motive. She
would no longer think he'd acted of
his own free will. Perhaps if she
knew this truth, she might allow him
to resume their old intimacy. . . .
But Elizabeth, what of her? She was
waiting, waiting there at Edmore,
for him to marry her. In honor and
faith he could not break away now.
That secret and powerful circumstance
still bound him and would bind
him to her all his life.

A half-mile up in the fleecy clouds
up above the pretty city of Edmonton,
Mr. "Buzard" Featherfoot was
dropping out top parachutes carry-
ing free cakes and printed matter of
the E-Z Kiern Soap and Washing
Powder Company, Ltd.

He was tired, stiff, hungry and in-
discernibly bored.
During the late war Buzard had

to back him, Buzard had found this
free-lance work to be tough shoddy.
Had found difficulty keeping up re-
pairs on his old machine, let alone
getting a new one. Jobs were sheer
scoundrels. Except for the faint possi-
bility of murdering some more gasso-
porous over near High Hat, the work
he was finishing this noon was the
last thing in sight.

As he heaved overboard the last of
the E-Z Kiern Soap and printed
matter, and handed back for the land-
ing field, he yawned and swore:
"The devil with this peace-time
stuff, Oh, Lord, I wish they'd bring
on another unpleasantness."

It was in some such frame of mind,
as he landed and crawled out of the
cockpit, that he saw a tall lanky in-
dividual, in lace boots, khaki trousers,
jacket and gray hat, get out of a
waiting taxi and saunter toward him.
The stranger, as he came up, looked
at the machine with that peculiar
respectful gaze of a person who has
never flown in one.

Buzard thought, "If that fellow
wants to take him for a joy ride,
I'll murder him with a monkey-
wrench!" A moment later, as he got a
clear look at that hard purposive
face, he decided, "No, he's not that
kind. Looks like some timber duke.
Maybe wants me to fly him out to his
limit. Thirtieth-dollar job—dammit!"

The stranger came on, "Hello."
Buzard answered tartly, "Hello
yourself!"
The stranger paid no attention to
the brusque reply, instead he reached
out his hand. It was a good-looking
hand, big, calloused, fingers like iron
bars.

"Name's Baker," he introduced
himself, "Alan Baker."

Buzard partly laughed. This fel-
low, with a look like he's somebody,
his slow smile was mighty fetching;
his clear intelligent eyes were kindly,
warm, friendly.

"Glad to know you, Baker. Mine's
Featherfoot—James Arbuthnot Feather-

"Good gracious! All that? But
what do people call you?"
That they grinsed. "They call me
'Buzard.' Wear red helmet; never
stop my wings."

"Buzard"—that's more like I saw
you sailing around there when I got
off the train. Made inquiries and
hustled out here to the field. Was on
my way down to Winnipeg. Expected
I'd have to go down there, or maybe
to Chicago, to find a machine and a
pilot."

Baker jerked his thumb at the
plane. "Where is that?"
"Looking at you. Belongs to me
and myself. Unlimited. Bought it
with cigarette coupons."

"That's a fine machine," Baker
jerked his thumb at the
plane. "Where is that?"
"Looking at you. Belongs to me
and myself. Unlimited. Bought it
with cigarette coupons."

He was, however, ambitious to get
a big new De Havilland so that he
could safely take up a girl down to
Kamloops and carry her along with
him on his airy path of life. But
with no advertising or big company

FREE TRIAL OFFER OF KRUSCHER

If you have never used Kruscher, try
it now at our expense. We have
a great special
"GIANT" package which makes it
easy for you to prove our claims for
yourself. Ask your druggist for the
new "GIANT" 75c. package.
The contents of our new "GIANT" package
with a special trial bottle—sufficient for about
one week. Upon the trial bottle being used, the
Kruscher does everything we claim it to do, the
regular package and without question.
Your druggist is authorized to return
the trial bottle and without question.
What would be better? Kruscher's ex-
pression is: "Kruscher's is the only
Kruscher." (Kruscher's is the only
Kruscher.)

"That would take me some time to
explain. I wouldn't want any man to
tackle it without him understanding
the whole thing, or then he might feel
I'd dragged him into trouble."

Something in Baker's tone made
Buzard look at him sharply. "Not-
hing ill—crook—out of the ordinary, is
it?"

"It's all three, and then some."
Buzard bit his cigarette. "And then
some? My eyes! What's your de-
signing was all?"

"If you want to know who I am, I
am in the Mounted. The O.C. here at
Edmonton can tell you about me.
And I can give you other references."

"You were in the Mounted?" Buzard
frowned thoughtfully. "Baker—
the Mounted. . . . Say, haven't
I heard or read somewhere . . .
Are you that Sergeant Baker down
north near the Arctic?"

Alan nodded.
"My eyes! I've read about some of
your doings. You're on a detective
trip or something like that, Baker?"

With expert judgment Alan had
been doing up his new acquaintance
from his brick-red helmet, down
his old-spattered jumpers, to his
"cavalry" shoes. He was
the darndest in this Featherfoot. He
was a man after Alan's own heart.

And he had a machine of his own! If
only he could get it, he would save
himself from the need of a machine.
Alan said: "My story is a long one.
You look as hungry as I feel. . . ."

"I am, Baker. Let's go eat and
talk."

Alan helped him pull a canvas over
the machine. Together they stepped
over to the house where they had
dinner. They stepped over to the
house where they had dinner.

Over-Production Of Tea

Supply Greatly Exceeds Demand and
Market is Glutted

There have been for some time past
two policies before the tea industry.
One to restrict production in the
East, and the other to force up prices
thereby of forcing up prices.
The other was to leave production un-
checked but to seek free markets.
The latter policy is almost impossible
to carry out in the face of restric-
tions on trade in every quarter. In
microcosm the tea industry reflects
the troubles of all the big industries
of the world; world production is at
least 20 per cent. ahead of world con-
sumption. The market is glutted with
tea; London stocks at the end of 1932
were forty-one million pounds in ex-
cess of stocks at the end of 1931. And
as output has increased, so have prices
slumped. The old distinction be-
tween medium and common teas has
disappeared, and if the unrestricted
production of the last year or two
continues the price for good tea will
go the same way too, and about one-
third of India's tea gardens will be
forced to close down.—Calcutta Eng-
lishman.

Little Helps For This Week

"Show me Thy Paths, O Lord; teach
me Thy ways." Psalm 24.
That which is so often asked of
God is not so much His will and way
as approval of our way.—F. W.
Staley.

When we cannot see our way,
Let us trust and still obey:
He who leads us forward go,
Cannot fail to show the way.
Though the sea be deep and wide,
Though a passage seem denied,
Fearless let us still proceed,
Till the Lord vouchsafes to lead.

There is nothing like the first
glance we get at duty before there
has been any special pleading of our
excuses or inclinations. Duty is never
uncertain at first. It is only after
we have become involved in the
mazes of wishing things were other-
wise that they are that it seems in-
decisive. Considering a duty is often
explaining it away. Deliberation is
often dishonesty. God's guidance is
plain when we are true.—F. W. Rob-
ertson.

Proved Good Friend

Motorist Was Rewarded For Giving
Man A Ride

A friendly motorist, speeding to
ward Kingston, Ontario, picked up a
pedestrian. He continued again to
speed up around 60 miles per hour.
Overhauled by an officer, his name
was taken and he was told to appear
in court at Kingston on such a day.
When he let down his pedestrian in
the Limestone City, the latter turned
to him and said: "I appreciate
your kindness. I am on parole and
I need to get to Kingston as soon as
possible. I am a good driver and I
just to show you my appreciation for
the ride, here is the book of the mo-
tor cycle cop with your entry in it."

THE RHYMING OPTIMIST

By Alice Macdonald

THE ARTIST'S SWEETHEART
I know that you have made me live
Upon the canvas there;
Although, perchance, your brush must
give
More beauty than my share.

But in your eyes—ah! well I know
You are the full of grace,
And that is why you limned me so,
Fair form and ardent face.

Another artist might have said:
"You are the full of grace,
And that is why you limned me so,
Fair form and ardent face."

But you have glimpsed within the
clay
What others cannot see,
A spirit shining at the day,
The inner self of me.

And you have painted what I seem
To be, transforming sight
Not just a woman, but a dream
Of all things pure and bright!

Puzzle Me Important
Have you heard the new story
about the latest parlor game?
The lady of the house suggested to her
maid that she make some biscuits for
lunch.
"I've got a ligamvulga on the bread
board."

Policeman: "What are you standing
here for?"
Loser: "Nothing."

Policeman: "Well, just move on. If
you're stood in one place, how
would the rest get past?"

American agricultural equipment
has been introduced into Portugal.

**Miss Campbell's Recipe
for Cup Cakes**
1 cup butter 1 cup pastry flour
1 cup sugar (or 1 1/2 cups) 1 egg
1 teaspoon vanilla 1 teaspoon Magic
1 teaspoon salt 1 cup milk

Cover butter thoroughly with sugar,
add a little at a time, beating well. Add yolks
of eggs and vanilla, beat well with
beating powder and salt, and add
milk. Fold in stiffly beaten egg whites. Bake in
greased cup cake tins, for 20 minutes.
Cups, in moderate oven at 375° F., about
25 minutes. Remove from oven, cool,
sprinkled with powdered sugar. Or cook,
as directed, in muffin tins. See recipe
delicious frosting recipes in the Magic
Cook Book.

"Cup Cakes are delicious when made with Magic Baking Powder,"

says Miss Helen Campbell,
Director of
The Chateleine Institute

"Good baking goes hand
in hand with good materials,"
Miss Campbell will tell you.

"That's why Magic Baking
Powder is used and recommended
by The Chateleine Institute.
Magic meets all the Institute's
rigid requirements of fine quality
repeated tests have proved it
absolutely pure, uniform and de-
pendable."

The majority of dietitians and
teachers of cookery throughout
Canada plan their recipes for
Magic. They use it exclusively
because they know it gives con-
sistently better results.

And so of Canadian house-
wives say Magic is their favorite.
It outstays all other baking
powders combined.

Remember—substitutes are
never as good. Do as the experts
do. Use Magic Baking Powder.

Free Cook Book—When you bake
at home, the new Magic Cook Book
will give you dozens of recipes for
quick baked foods. Write to Standard
Baking Limited, 7700, Avenue
Liberty Street, Toronto, Ontario.

FOR ANY PAIN

Have you ever found any
quicker relief than this?

Anyone can take Aspirin, for
doctors have declared these
tablets perfectly safe.

And there is no quicker
form of relief for any pain.

It is well to remember these
things when anyone tries to
persuade you to try anything
in place of these tablets.

Aspirin may be taken as
often as there is any need of its
comfort: to stop a headache,
throw off a cold, drive away
the pains from neuralgia, neuritis,

rhumatism, lumbago, etc.

Whenever you take Aspirin
you know you are going to get
immediate results—and you
know there will be no ill effects.

You know what you are taking,
Why take chances on some
form of relief which may not
be as swift—may not be as
safe? The new reduced price
has removed the last reason for
over experimentation with any
substitute for Aspirin!

Aspirin is a trade-mark registered in Canada

About Town and Country

EYES EXAMINED.
at Oyen Hotel, on Monday afternoon, March 27, E.J. Anderson, B. Sc. in attendance.

Born—To Mr. and Mrs. C.H. Ford Dault of New Brighton on Wednesday March 8, 1933, a son.

Mrs. T. M. Nunn had the misfortune to break a wrist today when she slipped on the door step of her home in Oyen. She was taken to Cereid, where the injured wrist was X-rayed and set by Dr. D. L. Dick.

Mr. P. W. Moore was well satisfied at the result of his sale yesterday. The day was fine and mild, and a large number of bidders were present. B. H. Dick, auctioneer, was in good form and kept the bids coming in at a lively pace.

Mr. F. Radatz returned home Tuesday morning from Calgary, where he has been spending the winter.

Rev. E. F. Kemp returned to Oyen last Saturday from Edmonton, where he attended a session of the Home Mission Committee of the United Church. He conducted services at Excel, Superior and Oyen on Sunday.

Mr. and Mrs. Chas. L. Wilson of Sibbald are guests at the home of their daughter Mrs. C. L. Dunford.

Mrs. H. J. Cooper was a Calgary visitor last week.

Don't fail to attend the entertainment in Oyen United Church basement on Thursday, March 23. The program is sponsored by the Board of Stewards, and while the details of some are shrouded in mystery, patrons are promised a well worth while entertainment.

Mr. Dick Desmond returned home Tuesday from Kerrobert, where he has been spending the winter.

Mr. Edgar Dial is a town visitor today.

Mr. and Mrs. H. E. Briley, who have been spending the winter at the B. C. coast and in the state of Washington, returned to Oyen last Saturday.

Mrs. C. Rail, who has been visiting friends in Calgary, returned to Oyen yesterday.

Mr. and Mrs. J. P. Rorabeck left yesterday morning for Calgary where they will spend a few days.

Mr. W. F. Pratt was a week-end visitor in town from Hanna.

Mr. D. W. Brown of High River, arrived in town this morning and will shortly succeed Mr. Doig as manager at the Red and White store. Mr. Doig expects to leave with his family about the end of the month to return to Sunnybrook.

Mr. I. F. Shacker of Hanna was an Oyen visitor today.

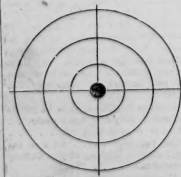

Excel Items

Excel Curlers Win MacPherson Cup from Chinook, Tuesday

In games played for the MacPherson cup at Chinook last night, F. Bishop, S. Thayer, P. Grise and B. Thayer were 3 down in their game with a Chinook rink composed of Butts, Nelson, Johnson and Peterson. On the other sheet of ice M. Kennedy, H. Cates, B. Bishop and V. Seymour were tied on the eleventh end with a Chinook rink composed of Miligan, Iac Murray and Rideout and scored 6 on the last end to win the cup for Excel with a margin of three. It's a slippery old game.

An Oyen ladies rink skipped by Mrs. Wade visited the Excel club rink last Wednesday afternoon, and won a game played against Excel ladies, eight to four. The other ladies on the rink were: Mrs. G. Longmuir, Mrs. D. L. Dick and Mrs. Duffy.

Mr. and Mrs. T. Lees, Mr. and Mrs. C. Stewart and Mrs. C. S. Wright were visitors at Excel rink last Thursday. Rinks were arranged as follows: C. Stewart skip, Mrs. T. Lees, C. Bishop and Mrs. F. Bishop; T. Lees, sk., Mrs. C. Wright, F. Bishop and Mrs. C. Bishop. Chas. Stewart won the game with his last rock. The visitors were entertained at lunch after the game by Mrs. Bishop.

Mr. Kennedy here is a diagram of the house. Please explain how you made the six-end!
